

ARBORSDIRECT
INCORPORATED

The World's First Complete Fiberglass Composite Arbor and Pergola System

- ArborsDirect fiberglass reinforced materials are extremely light yet pound-for-pound are stronger than steel, allowing for open spans of up to 18 feet.
- Engineered with ease of installation and long product life in mind.
- Corrosion resistant - unaffected by the elements or temperature.
- Custom sizes and designs to fit any application.
- Available with optional factory paint, including color matching.
- The use of state-of-the-art manufacturing technology and fiberglass composite materials creates structures of lasting value and beauty.

*An affordable, elegant, and virtually maintenance free
addition to your home, backyard, pool, or spa!*
